INJECTION PROCEDURES

COSMETOLOGY

"ROMITAL" clinic

We use equipment from leading world manufacturers, modern medical protocols and technological solutions in our work.

BEFORE and AFTER

Our inpatient rooms are equipped with all the necessary amenities:

single and double rooms with a TV, Wi-Fi, air conditioning, a private bathroom and meal service.

Our scientific department, together with leading Ukrainian and Israeli scientists, has developed a unique method of improving blood microcirculation, getting rid of surgical scars, increasing your own collagen, elastin and stem cells (UMUS technology).

The combination of modern developments and our exclusive ultrasound equipment gives a very high and long-term result!

We collaborate with leading Ukrainian scientific and medical institutions and serve as a training center for medical university interns. We also organize masterclasses and conduct research on advanced treatment methods.

Package No.1 (standard)
